

Engineer – Darwin

The Opportunity

If you're seeking a new career opportunity and enjoy the outdoors, this role in Darwin could be for you! It offers:

- > A lifestyle-friendly location and work environment
- > Opportunity to lead & deliver meaningful civil infrastructure projects
- > A supportive team focused on results, not bureaucracy

The Company

We are a well-established, multi-disciplinary engineering and design consultancy. We are known for delivering high-quality engineering and project management services, our work includes urban and regional land development, housing and civil infrastructure for private and public sector clients.

Key Responsibilities

You will take on project management and engineering responsibilities, you will manage the design process, with support from a senior engineer. The key responsibilities include:

- > Lead civil design projects
- > Design and documentation of roads, subdivisions, drainage, hydraulics and earthworks

- > Technical input to ensure designs meet project needs
- > Timely and budget-conscious project delivery

Key Skills & Attributes

You will ideally have:

- > A Civil Engineering degree (recognised by Engineers Australia)
- > 5+ years of engineering experience
- > Familiarity with Austroads and relevant standards
- > Experience in civil design, such as, roads, subdivisions, drainage and earthworks
- > Excellent communication skills and ability to build relationships

What's on Offer

This is your opportunity to join a forward-thinking company that values your professional and personal growth. On offer is a competitive salary package including 5 weeks annual leave, flexible work arrangements and relocation assistance available if required.
