

# Senior Engineer – Darwin

## The Opportunity

If you're seeking a new career opportunity and enjoy the outdoors, this role in Darwin could be for you! It offers:

- > A lifestyle-friendly location and work environment
- > Opportunity to lead & deliver meaningful civil infrastructure projects
- > A supportive team focused on results, not bureaucracy

## The Company

We are a well-established, multi-disciplinary engineering and design consultancy. We are known for delivering high-quality engineering and project management services, our work includes urban and regional land development, housing and civil infrastructure for private and public sector clients.

## Key Responsibilities

You will take on project management and engineering responsibilities, you will lead the design process, provide technical support and coach your team. The key responsibilities include:

- > Leading and coaching team members
- > Maintaining existing and building new client relationships

- > Design and documentation of roads, subdivisions, drainage, hydraulics and earthworks
- > Technical input to ensure designs meet project needs
- > Timely and budget-conscious project delivery

## Key Skills & Attributes

You will ideally have:

- > A Civil Engineering degree (recognised by Engineers Australia)
- > 10-20 years of engineering experience
- > Familiarity with Austroads and relevant standards
- > Experience in geometric design and modelling
- > Strong experience in design of roads, subdivisions, drainage and earthworks
- > Excellent communication skills and ability to build relationships
- > Proactive approach to coaching and team management

## What's on Offer

This is your opportunity to join a forward-thinking company that values your professional and personal growth. On offer is a competitive salary package including 5 weeks annual leave, flexible work arrangements and relocation assistance available if required.
